

ASHISH KUMAR

Staff QA Automation Engineer | Test Architect | CI/CD & Cloud | 12+ Years

 ashishkumar683768@gmail.com  8867462208  Bangalore, India  [LinkedIn](#)  [GitHub / Portfolio](#)

PROFESSIONAL SUMMARY

Senior QA Automation Engineer with 12+ years of experience across telecom, networking, EV charging, and cloud platforms. Currently at ChargePoint as a Staff QA Engineer, owning end-to-end quality engineering and test automation strategy across embedded firmware, REST APIs, and cloud infrastructure. Expert at designing scalable automation frameworks, driving shift-left validation, and embedding quality gates into CI/CD pipelines. Actively exploring AI-driven test generation, LLM-assisted QA, and prompt engineering for test coverage optimization.

KEY ACHIEVEMENTS

- Reduced regression cycles by 45% and feedback loops by 80% through reusable automation frameworks and CI/CD-integrated shift-left validation.
- Cut overall test execution time by 50%+ by establishing CI/CD-integrated test pipelines with GitLab CI, Jenkins, and GitHub Actions.
- Maintained <1% flaky test rate through data-driven, parameterized test design and execution guardrails.
- Lowered defect leakage by 20% across API, UI, and performance testing layers.
- Led a 10-member Agile squad as Scrum Master with 95% on-time sprint delivery.
- Integrated Grafana dashboards and Prometheus hooks into CI/CD pipelines for real-time test health visibility.

CORE COMPETENCIES & TECHNICAL SKILLS

Automation: Python, Robot Framework, Java, Playwright, REST Assured, Selenium, PyATS, Postman	Networking & Wi-Fi QA: OSPF, BGP, RIP, RvR, iperf3, DFS, Roaming, WAN/LAN
CI/CD & DevOps: GitLab CI, GitHub Actions, Jenkins, Azure DevOps, Docker, Kubernetes	Observability: Grafana, Prometheus, AWS CloudWatch
Cloud & Infra: AWS (EC2, CloudWatch), VMware, vSphere, Linux Containers	QA Practices: Shift-Left, TDD, BDD, Test Architecture, Quality Gates, API/Performance Testing
Performance & Security: JMeter, k6, Wireshark, ZAP, Burp Suite, OpenSSL	Methodologies: Agile, Scrum, SAgile, Test Strategy & Process Optimization

Currently Exploring: AI-driven test generation, LLM-assisted QA, prompt engineering for test coverage, Dockerized GitLab pipelines, and Azure automation to enhance scalability and visibility.

WORK EXPERIENCE

ChargePoint | Staff QA Engineer

Nov 2025 – Present

EV Charging Platform – Hardware & Cloud QA

- Own quality engineering and test automation strategy across EV charging hardware, embedded firmware, and cloud-based platform services.
- Built and maintained scalable test automation frameworks in Python, expanding functional coverage by 50%+ across hardware and cloud layers.
- Developed and owned REST API test suites using Postman and REST Assured, identifying critical regressions early and safeguarding release quality.
- Established CI/CD-integrated test pipelines (Jenkins, GitLab CI, GitHub Actions), cutting overall test execution time by 50%+.
- Implemented SQL and PostgreSQL-driven test data strategies for provisioning, validation, and diagnostics — improving traceability and reducing manual debugging overhead.
- Set up Grafana monitoring and AWS CloudWatch alerting to surface test health and infrastructure performance metrics.

- Drove ~30% reduction in test flakiness by rearchitecting unstable cases, enforcing execution guardrails, and adopting parameterized testing.
- Embedded quality gates and shift-left validation in collaboration with hardware, firmware, and platform engineering teams.

Tech Stack: Python, Postman, REST Assured, Jenkins, GitHub Actions, GitLab CI, SQL, PostgreSQL, Docker, Grafana, AWS, CloudWatch, EC2, Agile, Scrum

BT Group | QA Engineering Professional

Jun 2022 – Nov 2025

Network Surveillance Management Platform (OSS / Service Assurance)

- Led end-to-end QA automation, validation, and quality governance for the OSS Network Surveillance and Service Assurance ecosystem.
- Architected a modular automation framework in Python, Robot Framework, and Java, integrated with GitLab CI/CD, Docker, and Grafana for live execution analytics.
- Automated UI, API, and microservice validations using Playwright, REST Assured, and Postman/Newman — expanding regression coverage by 40% and enabling parallel execution.
- Designed data-driven test suites covering network topologies, alarms, and KPIs across L2/L3 protocols (ARP, OSPF, BGP) and Wi-Fi subsystems.
- Introduced shift-left static validation gates reducing feedback loops from 120 mins to <5 mins and defect leakage by 20%.
- Functioned as Scrum Master for a 10-member Agile squad, achieving 95% on-time delivery through sprint retrospectives and backlog refinement.

Tech Stack: Python, Robot Framework, Playwright, REST Assured, Postman, GitLab CI/CD, Docker, Grafana, Prometheus, AWS, ServiceNow

TCS (BT Engagement) | Technical Lead – QA Delivery

Mar 2021 – May 2022

Network Surveillance / OSS Service Assurance

- Served as QA Delivery Lead for BT's OSS automation modernization initiative.
- Designed end-to-end automated regression suites using Python, Robot Framework, and Playwright for microservice-based telecom workflows.
- Boosted pipeline efficiency by 45% by integrating automation into GitLab CI/CD with AWS environments, Docker containers, and Grafana monitoring.
- Conducted functional, API, and performance testing using REST Assured, Selenium, and JMeter under high-traffic network loads.
- Authored test strategy, migration playbooks, and ServiceNow QA documentation — supporting zero-downtime deployments.

Tech Stack: Python, Robot Framework, REST Assured, Selenium, JMeter, GitLab CI/CD, Docker, Grafana, Postman, ServiceNow, Agile Jira

Wipro | Senior QA / Test Automation Engineer

Aug 2014 – Mar 2021

Client Engagements: Ericsson | Cisco | HBI | Capital One | Nokia

Ericsson (Dec 2014 – Apr 2016) — SmartEdge Routers & ENM/NMS Systems

- Automated L2/L3 protocol suites (OSPF, BGP, RIP) using Python and Robot Framework; improved test reliability by 25% through modular scripts and VMware-based virtual environments.

Tech Stack: Python, Robot Framework, VMware, Linux Shell

Cisco (Apr 2016 – Jan 2017) — TelePresence Management Server (TMS) & Web Security Appliance (WSA)

- Automated API, UI, and security testing with Java, Selenium, REST Assured, Postman, Burp Suite, and Wireshark — reducing manual effort by 40%.

Tech Stack: Java, Selenium, REST Assured, Postman, Burp Suite, Wireshark

HBI (Feb 2017 – Dec 2017) — Security Administration & Access Management Portals

- Performed compliance, vulnerability, and audit testing — improving defect detection accuracy by 20%.

Capital One (Feb 2018 – Nov 2018) — AWS Cloud Migration & Data Integrity Validation

- Automated ServiceNow workflows enabling 30% faster compliance reporting and zero downtime during production cutovers.

Tech Stack: AWS, ServiceNow, Python

Cisco (Dec 2018 – Feb 2020) — TelePresence & Network Provisioning Frameworks

- Developed PyATS-based automation cutting regression cycles by 25%; integrated test execution into CI pipelines for consistent environment validation.

Tech Stack: PyATS, Python, Jenkins, CI Pipelines

Nokia (Feb 2020 – Mar 2021) — Network Management Systems (NMS) & API Management

- Enhanced reliability and performance metrics by 20% through structured API regression coverage and load testing using REST Assured, Postman, and JMeter.

Tech Stack: REST Assured, Postman, JMeter, Python

EDUCATION

M.Tech – Software Engineering (WASE) | Birla Institute of Technology & Science (BITS), Pilani | 2019

BCA – Bachelor of Computer Applications | New Horizon College, Bengaluru | 2014
